SBC 0108 PA

IN THE SPECIFICATION:

Please replace paragraph [0017] with the following amended paragraph:

A1 [0017] In operation, for each transaction on the telecommunications network 10, a record in the form of a call ~~detailed~~ detail record is created. For each type of service provided by the telecommunications network 10, a separate processing system may exist. In this example, the service of concern is calling card services and the system which processes all calling card transactions is the cluster 14 or multiple clusters 14. Cluster 14 may also process other enhanced network services such as Automated Attendant, or the enhanced network services may be processed by their own corresponding subsystem of the telecommunications network 10. In any event, for purposes of illustration herein, each calling card transaction on the telecommunications network 10 generates a CDR by cluster 14.
